

DWG-PP-700

DATE	REV	DESCRIPTION	DRAFTING	CHECKED
2008. 03. 26	A/0	NEW		

Main function:

The signal transmitter can generate a signal in the working zone. The signal is transmitted to patch panel to light up LED, easy to point out the location.

No need labeling on the installation cable, which can speed up the field application. The failure can be identified quickly and easily in the future maintenance.

Unless specified on the drawing, tolerances are per the follows:	
X.	±0.20
.X	±0.10
.XX	±0.05
