Outdoor Indoor Mobile Extension Reel Cable

Operating Instruction

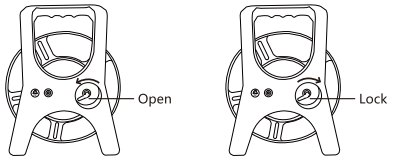

View

Method of Use

Place the spool to the network source, and then turn counter clock wise to open the fixed switch. After the fixed shaft, hold the female connector B and pull out the network cable to the place where it needs to be used. Then connect the network source with the female connector with the cable, and then connect the device with the female connector B with the cable.

When recycling, shake the hand rocker to make the network cable wound on the shaft wheel, and lock the fixed switch after recycling the network cable.

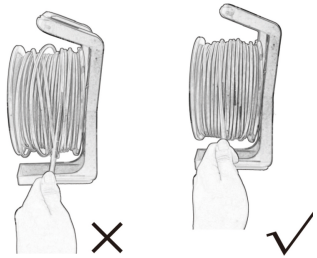

Note

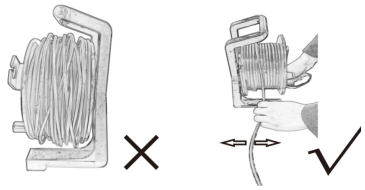

1. Do not bend the cable too much.

2. When using, the speed that wire is pulled is appropriate, cannot too fast.

3. After using, pay attention to the tightness between the wires when recovering and winding, and shake the rocker with the right hand and pull the wire evenly with the left hand to make the network cable neat.

Maintenance Method

- Do not clean the spool with wateror other liquids (such as shaft, cable, interface, etc., can be wiped with a clean cloth)
- Do not clean the product with any grinding tools or solvents that may damage the surface.
- After using, please wrap it with waterproof bag and place it in dry place to prolong the service life.
